RESPONSE TO RESTRICTION REQUIREMENT

This paper is responsive to the Restriction Requirement mailed on 11 March 2005, in which it is suggested that previously elected claims 7-20 are directed to patentably distinct species, namely, embodiment 1 (FIG. 3D), embodiment 2 (FIG. 3E), embodiment 3 (FIG. 5A), embodiment 4 (FIG. 5B), embodiment 5 (FIG. 5C), and embodiment 6 (FIG. 5D). It was also suggested that none of claims 7-20 are generic. The applicant respectfully traverses these suggestions.

In order for claims to be restricted to different species, they must be mutually exclusive. MPEP 806.04(f). The general test as to when claims are restricted to different species is the fact that one claim recites limitations which under the disclosure are found in a first species but not in a second, while a second claim recites limitations disclosed only for the second species and not the first. MPEP 806.04(f). This is frequently expressed by saying that claims, to be restricted to different species, must recite the mutually exclusive characteristics of such species. MPEP 806.04(f).

Claims 7-20 contain three independent claims, namely, claims 7, 12, and 17. Independent claim 7 recites features that are shared by the embodiments illustrated in FIGs. 3D and 3E, and comprehends within its confines the organization of those embodiments. Thus, claim 7 is a generic claim. MPEP 806.04(e), 806.04(d). Independent claim 12 recites features that are shared by the embodiments illustrated in FIGs. 5A, 5B, and

5D, and comprehends within its confines the organization of those embodiments. Thus, claim 12 is a generic claim. MPEP 806.04(e), 806.04(d). The embodiment illustrated in FIG. 5C corresponds to independent claim 17.

Thus, based on the above, the applicant provisionally elects claims 12-16 for prosecution.

Customer No. 20575

Respectfully submitted,

MARGER, JOHNSON, & McCOLLOM, P.C.
